Spiromax-PS

A Specially Designed Growth Promoting Formula
for Prawn & Shrimp

Spiromax-PS

is a scientifically proven formulation developed to enhance growth, weight, yield, and disease resistance in Prawn and Shrimp.

This unique blend contains concentrated Probiotics, Vital Compounds, Powerful Antioxidants, Chlorophylls and Flavonoids.

Together, these ingredients work to promote overall health of Shrimp.

CAA certified:

CAA Reg. No. CAA/MAY18/FA/01675

Spiromax-PS

A Specially Designed Growth Promoting Formula
for Prawn & Shrimp

Directions for Use

Mix Spiromax-PS thoroughly with regular vannamei feed using **“Binder X”** for best results, or as directed by your aqua consultant.

Adjust dosage according to the stage of culture as recommended below.

Days	Spiromax-PS	Frequency
1-30	20g / kg feed	Two times per day (Morning & Evening)
31-60	30g / kg feed	Two times per day (Morning & Evening)
61-90	40g / kg feed	Two times per day (Morning & Evening)
91-120	50g / kg feed	Two times per day (Morning & Evening)

Benefits

Reduces cultivation
time, leading to
faster harvest

Minimizes wastage
of feed and improves
FCR

Scientifically proven
to promote growth and
enhance immunity

Increases weight
and yield

Helps in disease
prevention

Spiromax-DR

A Specially Designed Disease Resistant Formula
for Prawn & Shrimp

Spiromax-DR

is a scientifically proven polyphyto formulation containing antiviral and antibacterial phytoactives that target and destroy disease-causing organisms in Prawn and Shrimp.

This concentrated blend restores health in disease-affected Shrimp and supports immunity and vitality.

Fight against:

- White Feces Syndrome
- White Gut Disease
- White Spot Disease
- Enterocytozoon hepatopenaei
- Acute hepatopancreatic necrosis disease
- Vibriosis
- Hemocytic Enteritis
- Hepatopancreatic Parvovirus
- Yellow Head Virus
- Gill Associated Viral diseases
- Infectious Myonecrosis Virus

White Feces Syndrome

White Spot Disease

Infectious Myonecrosis Virus

Vibrio and HPIV

CAA Certified:

CAA Reg. No. CAA/MAY18/FA/01676

Spiromax-DR

A Specially Designed Disease Resistant Formula
for Prawn and Shrimp

Directions for Use

Mix **Spiromax-DR** thoroughly with regular vannamei feed using “**Binder X**” for best results, or as directed by your aqua consultant.

Adjust dosage according to the stage of culture as recommended below.

For Regular Maintenance

Days	Spiromax-DR	Frequency
15-30	10g / kg feed	Weekly once (Morning & Evening)
31-60	15g / kg feed	Weekly once (Morning & Evening)
61-90	20g / kg feed	Weekly once (Morning & Evening)
91-120	30g / kg feed	Weekly once (Morning & Evening)

For Disease Control

Stage	Spiromax-DR	Frequency
Early stage	10-20g / kg feed	Continuous for 2 days (Morning & Evening)
Severe condition	30g / kg feed	Continuous for 2 days (Morning & Evening)

⚠ Caution : Do not exceed more than 30 g / kg feed

Benefits

Proven Polyphyto active formulation to fight against most viral and bacterial pathogens.

Vital Omega-3

Shrimp Growth & Immunity Enhancer

Algal Omega-3

with natural algal proteins and vital compounds

Why Choose Vital Omega-3?

- **Fast Growth:**
It promotes fast growth and improves overall health of the animal.
- **Strong Immunity:**
It helps to protect the animal, especially under stress.
- **Better Feed Efficiency:**
It promotes digestion and absorption efficiency, helping reduce FCR.
- **Shell Strength & Molting Support:**
Improves mineral balance for smooth molting and strong shells.
- **Pure & Safe:**
Free from antibiotics.

Vital Omega-3

Shrimp Growth & Immunity Enhancer

Directions for Use

10-50g/Kg of feed depending on stages of culture or use as advised by your Aqua Consultant.

Benefits

Improves growth performance and weight gain

Strengthens immunity and enhances survival rates

Supports shell formation and mineral balance

Enhances pigmentation and overall shrimp growth

Improves feed conversion efficiency

Reduces stress during culture and environmental fluctuations

FAQs

Q1: Can it be used at all growth stages?

Yes. Vital Omega-3 is suitable for nursery, grow-out, and finishing stages.

Q2: What is the recommended dosage at each stage?

- Nursery / Starter: 10g/kg of feed, 3-times/week
- Grow-out: 30g/kg of feed, 5-times/week
- Finisher: 50g/kg of feed, 5-times/week

Q3: Can it be used along with Spiromax-PS/DR and Vita-C?

Yes. It is fully compatible and can be used together for synergistic growth and health benefits.

Q4: When can farmers expect visible results?

Improved growth performance and activity are typically observed within 2-3 weeks of regular use.

Q5: Does it affect water quality?

No. Being algae-based, it is highly digestible and helps reduce water pollution.

Vita-C

Premium Vitamin C supplement for Shrimp
Growth & Immunity

Our premium **Vitamin C** supplement is specially formulated to enhance shrimp immunity, improve stress resistance, and promote faster growth and molting.

Enriched with stabilized Vitamin C for superior absorption, it supports stronger exoskeleton development and better survival rates under challenging pond conditions.

This supplement helps maintain optimum health and performance throughout the culture cycle.

Why Choose Vita-C?

- **Immunity Booster:**
Enhances white blood cell activity, reducing disease outbreaks by up to 30%.
- **Molting Mastery:**
Speeds exoskeleton hardening for up to 20% faster molting cycles.
- **Stress Protection:**
Lowers stress indicators in high-density ponds, improving feeding and survival.
- **Feed Synergy:**
Works synergistically with Omega-3 for 15% better nutrient uptake.
- **Clean Label:**
Stabilized ascorbate form, fully dissolvable, with no fillers.

Vita-C

Premium Vitamin C supplement for Shrimp
Growth & Immunity

Directions for Use

Mix 5 - 10g of **Vita-C** with 60 mL of “**Binder X**” per 1 kg of feed, and allow it to dry before use.

Benefits

Assists in disease prevention

Supports collagen synthesis & tissue development

Promotes enhanced growth & better feed utilization

Boosts immune system function

Helps in stress reduction during culture

FAQs

Q1: What is the starter-stage dosage?

Use 5 g per kg of feed during the nursery or early culture stage.

Q2: Can Vita C be used at all growth stages?

Yes. It can be used throughout nursery, grow-out, and finishing stages.

Q3: Can Vita C be used along with Spiromax-PS/DR and Vital Omega-3?

Yes. It is fully compatible and works synergistically with both products.

Q4: What are the key benefits of using Vita C regularly?

Improves immunity, stress resistance, survival rate, and overall growth performance.

Q5: Does Vita C help during stress conditions?

Yes. It is highly effective during stress events such as molting, water quality fluctuations, handling, and disease challenges.

Binder X

Strong Liquid Feed Binding Agent

Our natural polysaccharide feed binder ensures strong pellet integrity and minimal feed supplement loss.

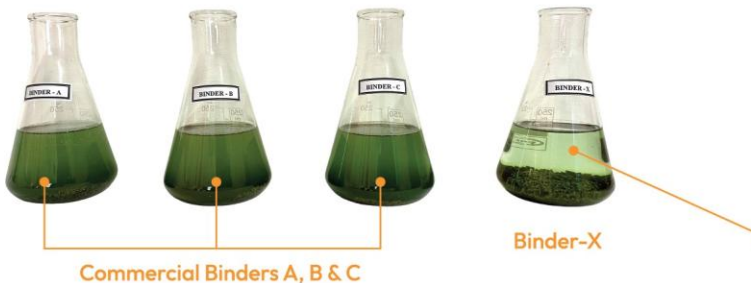

Binder X Performance Test:

Feed was coated with “Spiromax-PS” and “Binder X”, dried, then evaluated for binder efficiency under vigorous stirring and a 2-hour water stability observation.

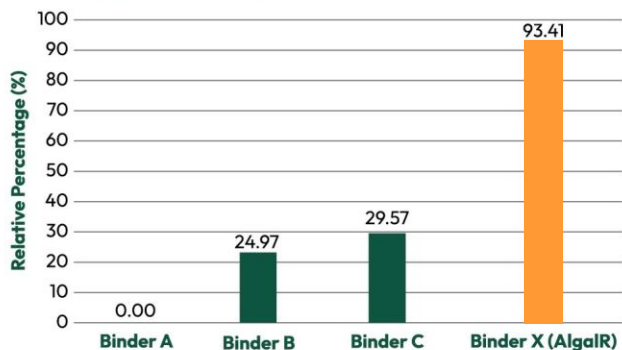

Visual Results

Binding Efficiency Test: Comparison of “Binder-X” with Commercially Available Binders (A,B, and C)

After Stirring and 2-hour Setting

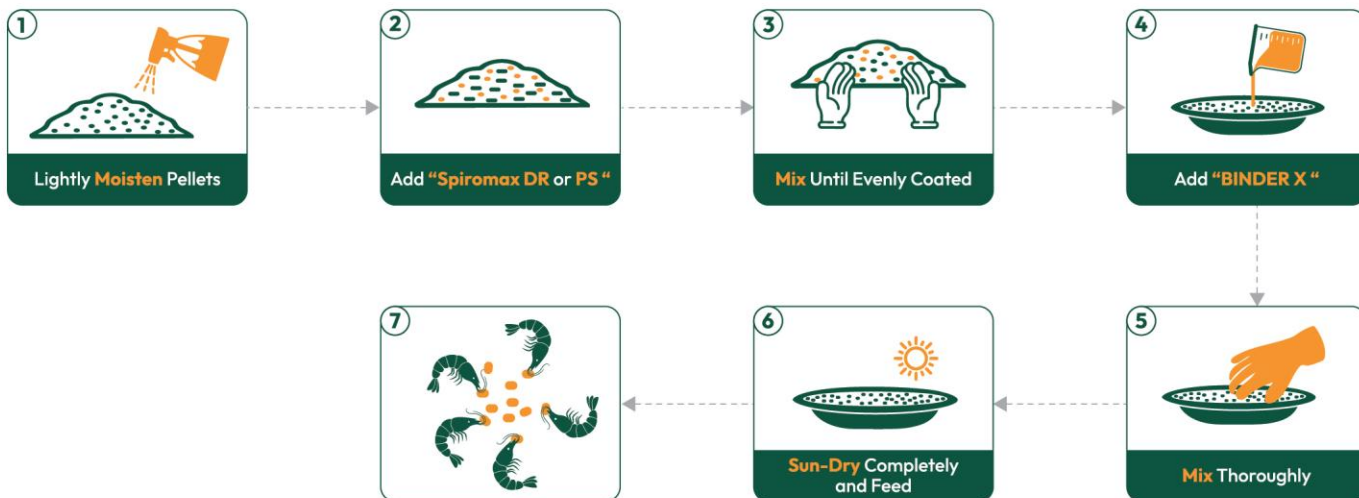

Binding Efficiency

Binder X

Strong Liquid Feed Binding Agent

Directions for Use

Benefits

Provides strong binding that prevents feed breakage and nutrient loss

Designed for smooth mixing, ensuring consistency in every batch

Enhances water stability, reducing waste and improves profitability

Antibiotic-free, safe, and natural
